

**Young leaders charging to meet the high-priority needs of Palmetto Health Cancer Centers.**

## **Kathleen and Jeff Muthig**

**Everyone has been affected by cancer in some way. For us, it hit close to home. Kathleen's mother was diagnosed with Multiple Myeloma when Kathleen was a toddler, and Jeff's mother was diagnosed with breast cancer when he was in grade school.**

**Our mothers have won their fights against cancer, but they only did so because of the expert medical care they received and the state-of-the-art facilities where they treated and where they continue to treat.**

**Palmetto Health offers Midlands cancer patients those same opportunities for hope and survival.**

**We are proud to be founding members of The Cavalry, a group of young people who donate to specific initiatives to further improve Palmetto Health Cancer Centers. Through The Cavalry, we hope to give other children more time with their mothers, like we have been fortunate to spend with ours.**
